Hair

Soon after having to have my gall bladder removed under general anaesthetic, I began to suffer severe hair loss. I tried various hair tonics with no success. A good friend advised me to take silicic acid and suggested a health food shop where she is a regular client. After receiving very helpful advice at the shop, I decided to try Original Silicea Balsam. Sure enough, the hair loss stopped surprisingly quickly and new hair began to sprout. A great success that saved my magnificent head of hair – I am delighted and grateful.

Nails

I have had very good experiences with Original Silicea Balsam. After I went on a diet, my fingernails became really brittle and had to be cut all the time. After applying Original Silicea Balsam for three months, my nails were so firm and beautiful that they now only break very rarely. I have to file them or cut them after the shower otherwise they are too firm to trim.
I will definitely use it again.

Hair, skin

I don't have a long story to tell about Silicea Balsam. But I am very grateful that this product exists. All 6 members of my family use it to heal and cure themselves, starting with my 3-year-old son, who suffers from a connective tissue disorder and neurodermatitis. He takes it orally and topically and the results were quick. His skin looks wonderful after using it for about a year.

My hip pains and hair loss were cured after taking it orally for a short time.

My 15 and 16-year-old daughters suffered from severe hair loss. Even just taking Silicea irregularly for around two months solved the problem. They don't even have split ends anymore. In fact, my 3-year-old's hair also got sturdier and stronger while taking it.

So thank you again for this product. We always have it ready to hand in our house!

Skin (sunburn)

I have had only positive experiences with Silicea Balsam. Last year I was on the Canary Islands. I like to sunbathe, but I'm too lazy to put on sun-cream and I burnt my shins terribly. (The rest of me was under a sunshade.) My legs looked like raw meat. That evening after showering and eating dinner, we (my husband and I) applied Silicea (chilled, from the fridge) and it felt wonderful. After 3 days, my legs were fine again. And Silicea is always the first thing I put on small cuts.

This year, we are going to the Caribbean and a big bottle of Silicea Balsam will definitely be going with us.

Skin, hair, nails / sunburn

I'd be happy to tell you about the great experience I've had with your Original Silicea Balsam.

It started a few years ago, the usual – brittle fingernails and dull hair!

Your silicic-acid product really helped me!

But it's only since having children that I've come to realise just how good it is.

My two boys 5 years old and 8 years old, they both spend a lot of time outdoors and (unfortunately) in the summer, they sometimes get too much sun and end up sunburnt!

The Silicea Balsam is really great for this – with a light application, the sunburn quickly fades!

There's no need for 'chemicals' – like antihistamine based gels (which a lot of people use for this sort of thing)!

And that's very important to me as a mother – no chemicals – which is why, as a mother, I'm very happy to recommend Silicea Balsam as a remedy for sunburn.

Itchiness and nails

In response to your request, I would be happy to help and would like to give you two short personal examples.

My mother (95 years old) suffered from itchiness for years – until ‘Silicea’ was recommended to me in a health food shop in Hamburg. The itchiness only lasted two more days – she used it constantly after that and had no more problems.

I, 57 years old, suffered from brittle (unsightly) fingernails that responded favourably after taking ‘Silicea’ for several months. I continue to take it as a preventative measure.

Thank you! ♥

Pain (Jellyfish)

Jellyfish can be a pain, especially when you bump into them while walking through the mudflats at the North Sea. Although the helpful German Lifeguard Association applied a lotion, and also alcohol should soothe the burning, no luck! So off I went to a health food shop and bought Original Silicea Balsam. Applied it to the leg after washing. Applied a protective dressing. Went to sleep. At midnight, the same procedure. And – a miracle – with Silicea Balsam Original, the next morning I was pain free!

Thank you, that’s the whole story.

Psoriasis

I’d like to give you a brief description of my experience with your “Silicea” product.

Around 5 years ago, I suddenly got psoriasis in my mid-forties. It got so bad that pieces of skin would fall off my arms, for example, and my personal and professional life (I work in sales) was seriously affected!

After a number of different treatments by 2 dermatologists and 3 naturopaths, which helped me to feel generally better, but did nothing for my condition, I came across a recommendation for your “Silicea” product. After around 2-3 weeks, my skin looked so much better and I’ve now been 95% psoriasis-free for the past 2 ½ months or so!

I can strongly recommend this product and I will – and I am so grateful that I found it.

Erythema (redness of the skin)

I am just in the process of preparing my things for this year's cycling tour. I had the Silicea bottle in my hand and I remembered that I have wanted to write to you for some time now.

The first few days of our tour last year were jinxed – it never stopped raining. So we pulled on our waterproofs and soldiered on. And of course we managed to work up quite a sweat under our waterproof gear! In any case, during the afternoon of the second day, I could really feel my behind and in the evening I was shocked when I took a look at my bottom in the mirror! My backside was bright red, sore and burned with a vengeance!

So I covered it with Silicea balsam, lay face down on the bed in a “submissive” position to allow the balsam to soak in and the entire area to dry.

My bottom was healed on the following day - and the day was saved! And the sun even began to shine!

I think you should also mention this use of the balsam on the pack insert!

Osteoporosis

For quite some time now, I've been taking Silicea on a regular basis because I had osteoporosis. Now, since I read in a book that calcium forms the building blocks and silica, or siliceous earth, is the mortar, I am actually preventing it. Throw vitamin D3 into this mix and only then will healing be possible.

I had lower level readings of 4.5, was really struggling to carry anything and had bad pains in my feet and legs. Now my reading is 7. Eight is normal for my age. I can carry my suitcase again and I no longer have any pain!!!

All thanks to Silicea, because I took calcium for many years and later on vitamin D, neither of which had any effect!

I also had a colonic irrigation and then took live organic cultures, as my intestine was full of casein and my body was no longer able to absorb the helpful substances from my intestine as normal.

There is nothing about this in your description of Silicea. And how many people suffer from osteoporosis!!!

I'd be so happy if you put this on your packaging very soon! Heals osteoporosis when used in combination with calcium and vitamin D3.

Spinal column

In mid-November 2009 I "did my back in" at the age of 66. I had dislocated vertebrae and a slipped disc. My doctor told me I would have to live with it and that it would never be normal again, that I would need to take it easy and never lift more than 10 kg. On the very same day, a woman gave me a bottle of Original Hübner Silicea which had already been opened. From that day onwards, I started taking your silicon dioxide every day. The result ?

Today I am completely free of any pain or symptoms. I do whatever I want and lift much heavier weights than the doctor told me I could.

Your product is quite simply amazing! Naturally I am going to keep using it every single day.

Customer from Germany

Hair, skin, nails

It says on the bottle that silica gel is for hair thickness not hair growth. With that said, I wasn't noticing any results. My hair seemed to be growing at the same rate as ever (slow). So I stopped using it after I ran out. I was advised to try it longer than one month, so I have, about 2 and a half months now. I went to see my esthetician who I see every month to clean my face and as she was wrapping my hair she asked me what I was doing to my hair. She said my hair since the last time she saw me is so thick that she thought I had hair extensions. I'm going to continue taking this supplement as it is obviously working for hair thickness not so much growth.

UPDATE

When I pull my hair to the side and touch the outer part of my scalp I can feel "baby hair" sprouting. Hair where I have never had hair before!

Female customer from UK

This stuff started working in 2 weeks! I have now little hairs all in my hairline! I have had thinning hair for two years and tried many things. When I added silica to my regime it just worked! I love this stuff! I definitely recommend it and am ordering more today!
